Safe-T-Vent® Nebulizer Released for International Distribution

(Melbourne, FL) – Airon Corporation is pleased to announce the release of the Safe-T-Vent Nebulizer for international distribution. In keeping with the tradition of “Quality Patient Care” Airon is introducing a new product for medication delivery with safety and continuum of care in mind. The Safe-T-Vent Nebulizer provides safe aerosol medication delivery during positive pressure ventilation. Using a special spring shut-off in the Tee piece, the nebulizer can be removed while safely maintaining CPAP pressure or ventilation.

“The true value of the Safe-T-Vent Nebulizer is during patient transport” said Eric Gjerde, President & CEO of Airon. “Especially in the EMS environment, nebulizers are often used to provide critical medication delivery while using CPAP devices or ventilators. Nebulizers may become disconnected during patient movement or need refilling. It is very important that the CPAP or ventilation pressure not be lost when the nebulizer is removed. That’s where the superiority of the Safe-T-Vent Nebulizer shines.”

The Safe-T-Vent Nebulizer is available for purchase through Airon’s domestic and international distribution partners or directly from Airon Corporation. For more information call **888-448-1238 (USA toll free)**, **321-821-9433** or visit **www.AironUSA.com**.

ABOUT AIRON CORPORATION

Airon develops, manufactures and distributes pneumatic respiratory products for emergency medicine and critical care. Airon’s core products are ventilators and CPAP systems for use in hospitals, MRI, air transport, and emergency medical systems. These products are based upon Airon’s patented “High Tech Pneumatics” which has advanced clinical care standards using oxygen-powered devices. The pNeuton ventilators have been on the USA market since 2003 and are now sold in 21 countries around the world. All of Airon’s products are FDA approved and CE marked. Airon is also an ISO 9001 and ISO 13485 certified quality manufacturer. For more information on Airon Corporation, please visit www.AironUSA.com.
